01

EMBRACO is a global cooling specialist and leader in the refrigeration market, aiming to combine technology and services, engineered around customers' needs.

Our mission is to provide innovative solutions for a better quality of life. We are passionate about technology and constantly investing in new developments, energy efficiency improvements, sustainability of our products and processes, combined with premium quality, operational excellence, and business knowledge to support our customers to reach their goals and even exceed the most restrictive international standards.

What makes the difference when you choose Embraco?

Thanks to our wide range of products combining hermetic and scroll compressors, condensing units and electronics, we can provide ultimate solutions for Household, Light Commercial and Aftermarket segments.

Our global footprint, with factories and offices located in Brasil, China, Italy, Mexico, Russia, Slovakia and United States, assures premium service level and runs flexible business in more than 80 Countries all over the world.

Our 500 professionals in R&D, laboratories and tech centers in 4 continents assure a constant focus and wide experience to support customers in the development of their solution.

-  More than 11,500 employees
-  More than 400 professionals in R&D
-  Production capacity of over 38 million compressors per year
-  More than 500 million products produced to date
-  More than 1,200 patents worldwide
-  Business conducted in more than 80 countries
-  R&D laboratories on 4 continents

embraco
transforming insights into great cooling experiences

ABOUT EMBRACO

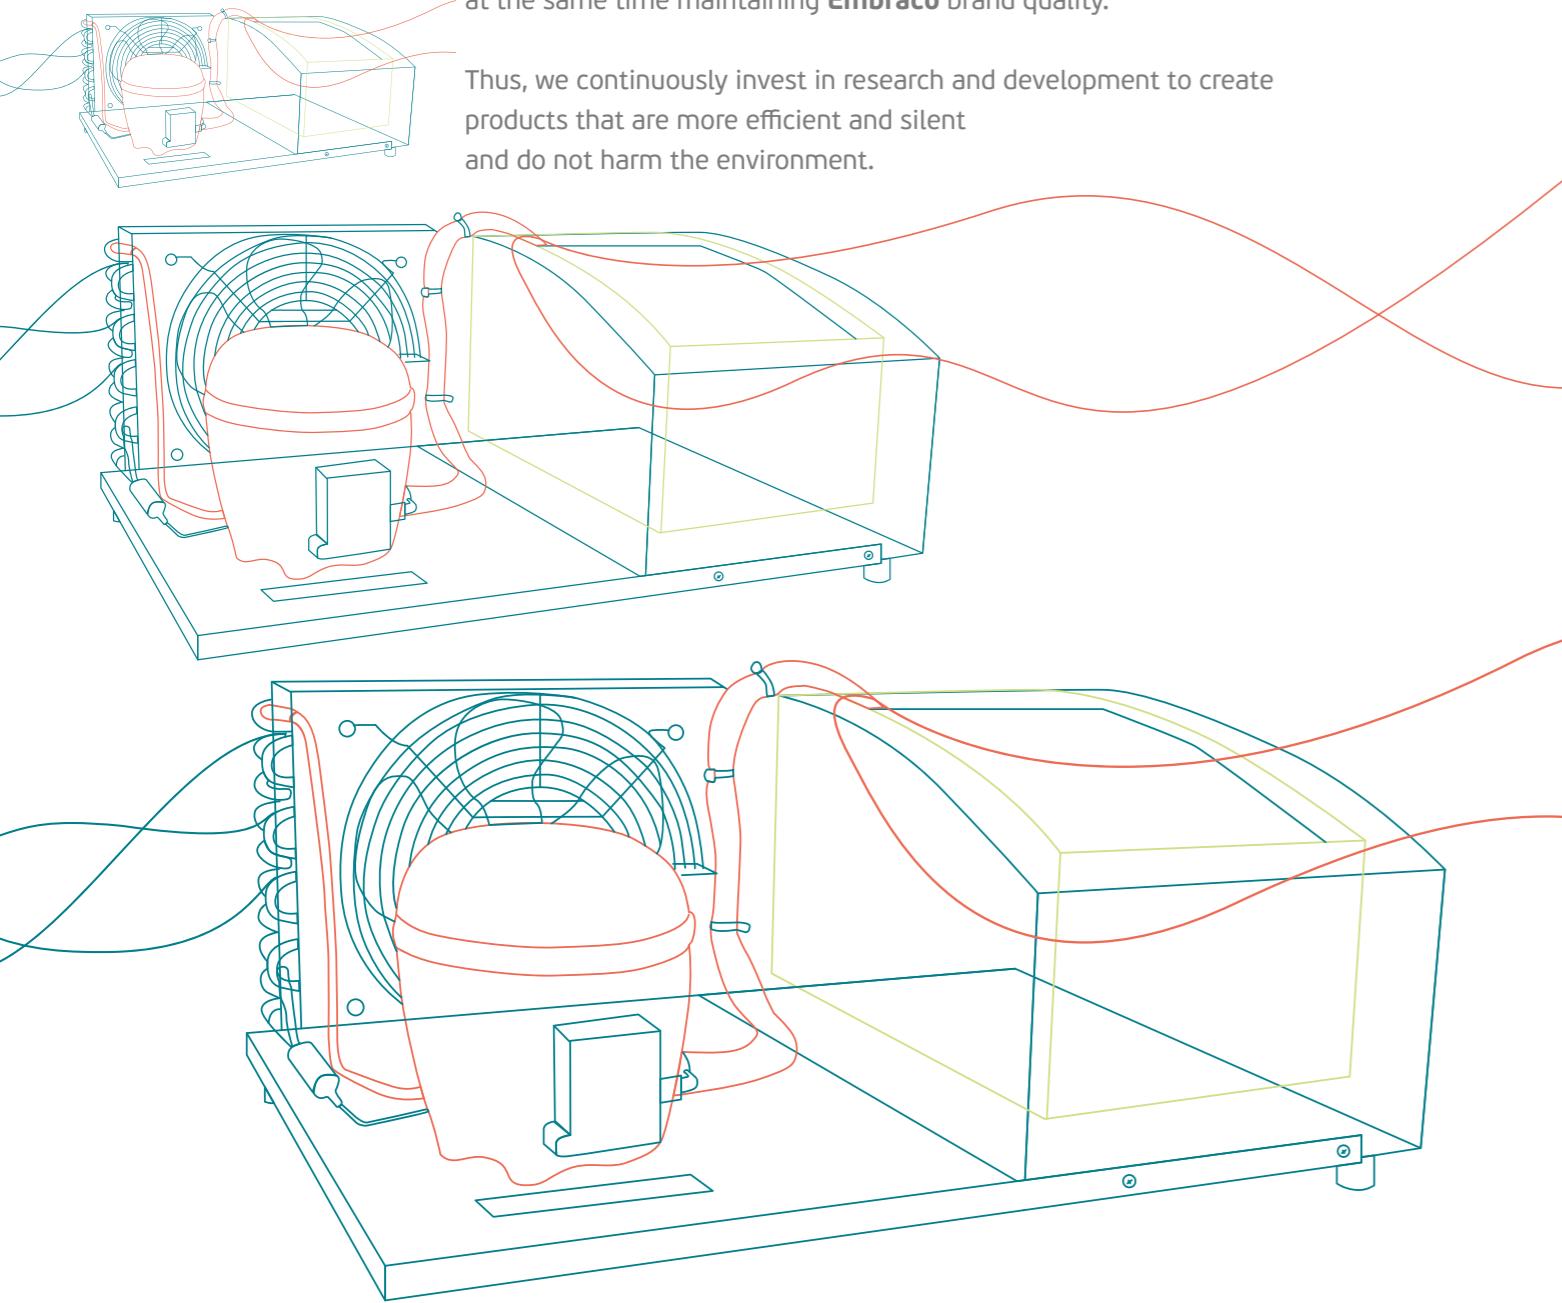

HIGH EFFICIENCY

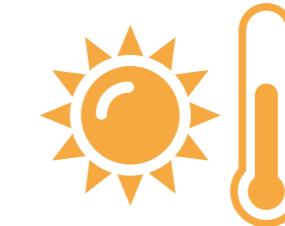

Energy efficiency is the base for all our product development. This means producing compressors that consume each time less energy and less raw material in manufacturing at the same time maintaining **Embraco** brand quality.

Thus, we continuously invest in research and development to create products that are more efficient and silent and do not harm the environment.

embraco

TROPICAL AND SUPERTROPICAL

All the Embraco Condensing Units are tested for tropical temperatures up to 43°C.

Available range tested for supertropical temperatures up to 48°C

EU ECODESIGN REGULATION

THE COMMISSION REGULATION (EU) DOSSIER NO 11898/14 IMPLEMENTING DIRECTIVE 2009/125/EC OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL WITH REGARD TO ECODESIGN REQUIREMENTS FOR PROFESSIONAL STORAGE CABINETS, CONDENSING UNITS AND PROCESS CHILLERS WILL ESTABLISH MINIMUM EFFICIENCY PERFORMANCE STANDARDS (MEPS) FOR NEW PRODUCTS BEING PLACED ONTO THE EU MARKET AS OF JULY 1ST 2016.

The Ecodesign Directive aims to reduce the environmental impact of energy related products during their entire lifetime, it provides a framework with specific and mandatory requirements for improving product quality and environmental protection, reducing energy and resources consumption and significantly contributing to the EU's 2020 energy efficiency objective.

In addition to this, the Energy Labelling gives clear information about the energy consumption and performance of specified appliances, helping consumers and end users to select energy efficient products allowing them to make informed purchasing decisions..

The EU legislation on Ecodesign is an effective tool for eliminating the least performing products from the market. As regards to the refrigeration systems, this regulation shall apply to professional refrigerated storage cabinets and blast cabinets, condensing units operating at low and medium temperature (monoblock units or split units are excluded). If, for instance, Ecodesign requirements for domestic refrigerators do not respect the Ecodesign Directive criteria, any refrigerator which does not comply with these requirements will not be CE marked and therefore cannot be sold in the European Union.

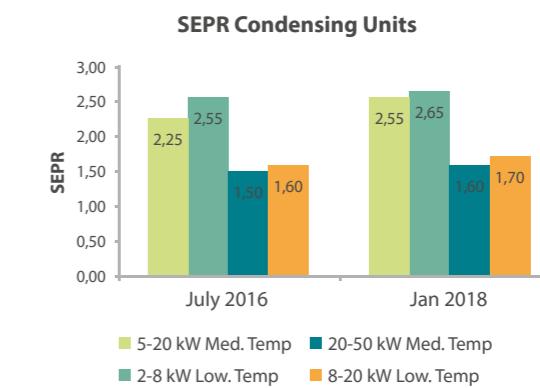

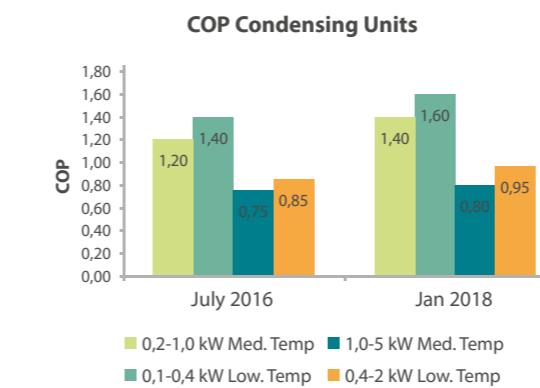

**EFFECTIVELY JULY 1ST, 2016,
THE ENTIRE EMBRACO CONDENSING UNITS RANGE
WILL MEET THE STANDARDS REQUIRED
BY THIS NEW REGULATION,
ENSURING THE CONFORMITY OF ITS PRODUCTS.**

THE ECODESIGN REQUIREMENTS

The coefficient of performance (COP) and the seasonal energy performance ratio (SEPR) of the condensing units shall not drop below the values indicated in the following table:

OPERATING TEMPERATURE	RATED CAPACITY P_A	APPLICABLE RATIO	VALUE
MEDIUM	$0,2 \text{ kW} \leq P_A < 1 \text{ kW}$	COP	1,20
	$1 \text{ kW} \leq P_A < 5 \text{ kW}$	COP	1,40
	$5 \text{ kW} \leq P_A < 20 \text{ kW}$	SEPR	2,25
	$20 \text{ kW} \leq P_A < 50 \text{ kW}$	SEPR	2,35
LOW	$0,1 \text{ kW} \leq P_A < 0,4 \text{ kW}$	COP	0,75
	$0,4 \text{ kW} \leq P_A < 2 \text{ kW}$	COP	0,85
	$2 \text{ kW} \leq P_A < 8 \text{ kW}$	SEPR	1,50
	$8 \text{ kW} \leq P_A < 20 \text{ kW}$	SEPR	1,60

OUR PRODUCTS

SINGLE SPEED COMPRESSORS**FULLMOTION INVERTER COMPRESSORS****CONDENSING UNITS****SLIDING UNITS****MULTICOMPRESSORS SOLUTION****embraco**

**UEMT**

- Low noise
- High efficiency level
- Wide application range
- Compact size

AVAILABLE FOR:

R134a
R404A/R507/R452A
R290

APPLICATION:

LBP, M/HBP

COMPRESSORS FROM:

3,4 CC TO 7,69 CC

**UNJ**

- Small size platform
- High energy efficiency
- Reduced noise level

AVAILABLE FOR:

R134a
R404A/R507/R452A

APPLICATION:

LBP, M/HBP

COMPRESSORS FROM:

21,7 CC TO 34,4 CC

**UNE/UNEK/UNEU**

- Low noise
- Low vibrations
- High reliability in severe working conditions

AVAILABLE FOR:

R134a
R404A/R507/R452A
R290

APPLICATION:

LBP, M/HBP

COMPRESSORS FROM:

6,2 CC TO 16,8 CC

**SLIDING UNITS STANDARD RANGE**

- Low noise
- High efficiency level
- Wide application range
- Compact size

AVAILABLE FOR:

*R134a
R404A/R507/R452A

APPLICATION:

LBP, M/HBP

* only LBP

**UNT**

- High efficiency level
- Very low sound level
- High cooling capacity at low evaporating temperatures

AVAILABLE FOR:

R134a
R404A/R507/R452A

APPLICATION:

LBP, M/HBP

COMPRESSORS FROM:

14,5 CC TO 27,8 CC

**SLIDING UNITS EXTENDED RANGE**

- Low noise
- High efficiency level
- Wide application range
- Compact size

AVAILABLE FOR:

*R134a
R404A/R507/R452A

APPLICATION:

LBP, M/HBP

* only LBP

MULTICOMPRESSORS

A new entry into Embraco's Condensing Units: Multicompressors architecture is the smart solution to have small size platform, hight efficiency and reduced noise level.

MULTICOMPRESSORS SOLUTION

- Small size platform
- High energy efficiency
- Reduced noise level

AVAILABLE FOR: R134a, R404A/R507/R452A

APPLICATION: LBP, M/HBP

COMPRESSORS FROM: 21,7 CC TO 34,4 CC

PRODUCT FEATURES

extended range up to 8,5kW

available for R134a, R404A

2 or 3 compressor units

compact size

lower energy consumption

power control: possibility to switch on or switch off compressors based on required cooling capacity

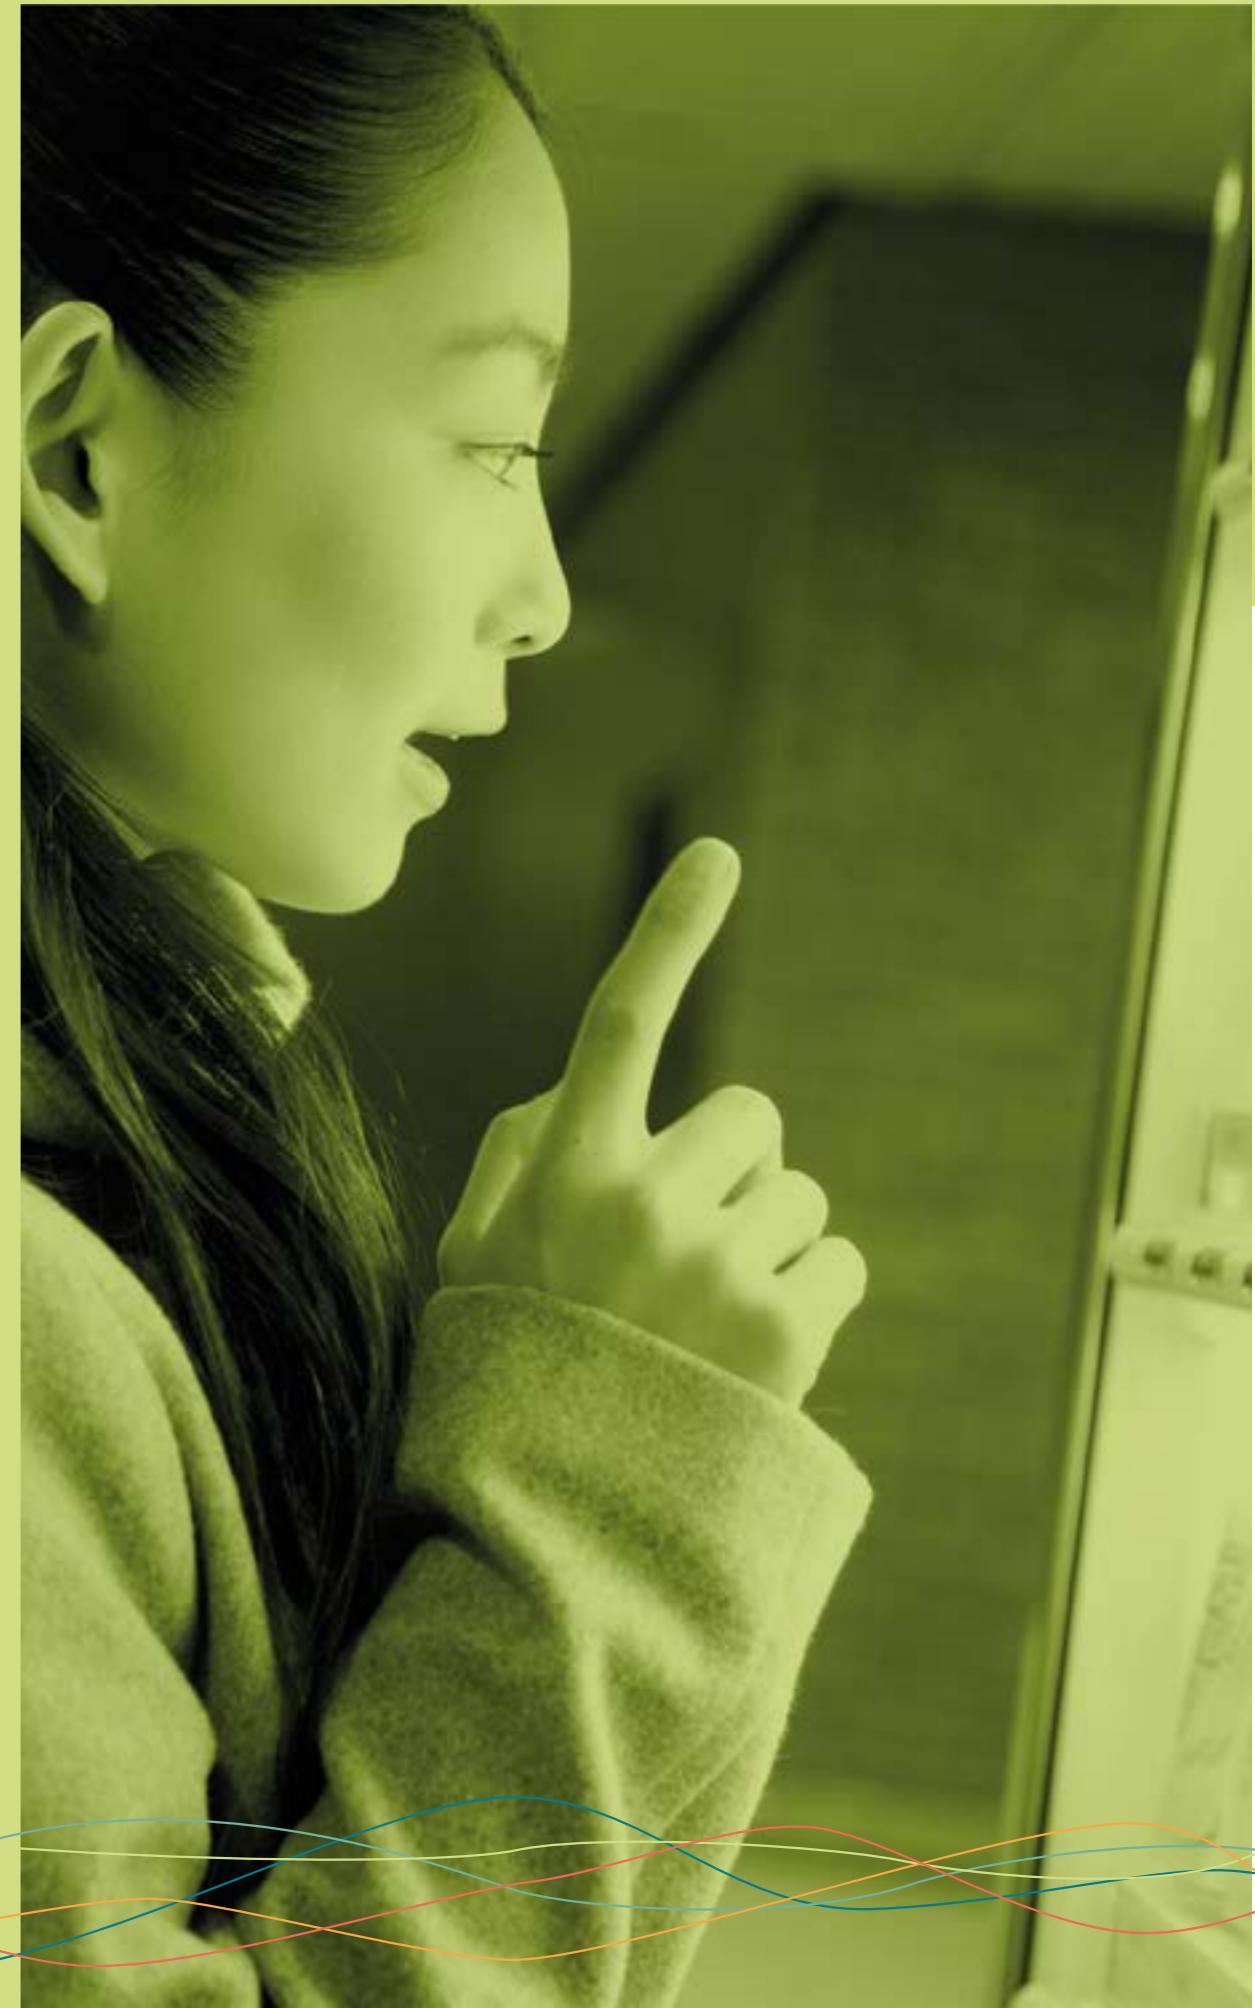

doublestage delay unit (timer)

gradually switching of high loads

IoT control elements

APPLICATIONS

	LOW BACK PRESSURE	APPLICATIONS:
LBP	Evaporating temperature lower than -20° C	refrigerators,frozen food cabinets, frozen food display cases, display windows, etc.
MBP	MEDIUM BACK PRESSURE	APPLICATIONS:
	Evaporating temperature between -20° C and 0° C	fresh food cabinets, drink coolers, ice makers, etc.
M/HBP	MEDIUM / HIGH BACK PRESSURE	APPLICATIONS:
	Evaporating Temperature between -20° C and +10° C	coolers, merchandisers, etc.
HBP	HIGH BACK PRESSURE	APPLICATIONS:
	High evaporating temperatures between -15° C and +10° C	fresh food cabinets, bottle coolers, dehumidifiers, etc.

TEST CONDITIONS

TEST CONDITIONS	APPLICATION	EVAPORATING TEMPERATURE °C	GAS RETURN TEMPERATURE °C	SUB-COOLING K	COMPRESSOR AMBIENT TEMPERATURE °C

ASHRAE	LBP	-23,3	32	3K	32
	M and HBP	7,2	32	3K	32

EXPANSION DEVICE

C	Capillary Tube.
V	Expansion Valve.

MOTOR TORQUE

LST	(Low Starting Torque) Compressor with RSIR - RSCR - PSC electrical motor for systems with capillary tube and with equalized pressures at start up.
HST	(High Starting Torque) Compressor with CSIR - CSR and 3ph electrical motor for systems with capillary equalized or not equalized pressures at start up.

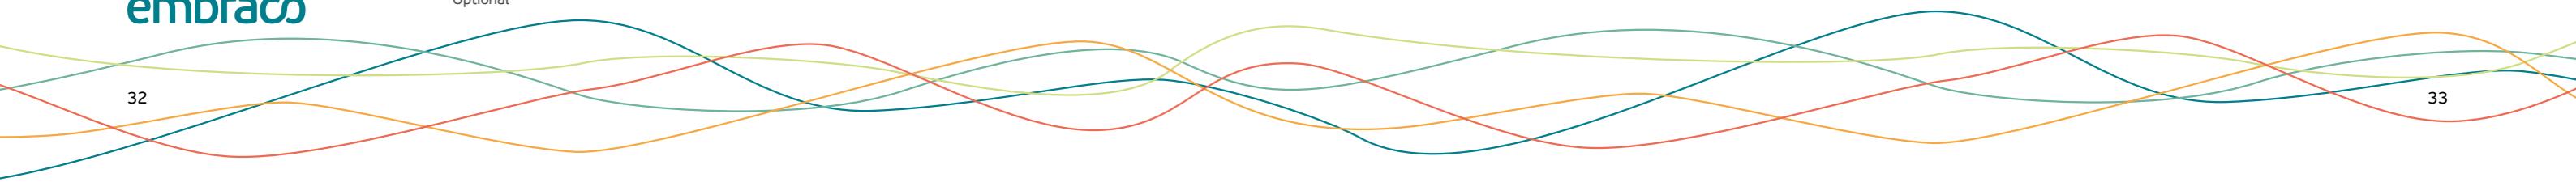

ELECTRICAL MOTOR TYPES

RSIR	Resistance Start - Inductive Run This motor type , used in the compressor of small power, has a low starting torque (LST) and must be applied only to capillary tube systems where the pressures equalize. The motor is characterized by a start winding with high ohmic resistance and must be disconnected when it reaches the stabilized rotational speed. An electromagnetic relay, calibrated for the motor current, disconnects the start winding at the end of the start up. An alternative to the electromagnetic relay is, for some models, a PTC solid state-starting device.
RSCR	Resistance Start - Capacitive Run Similar to RSIR motor version but uses a PTC solid state starting device and a permanent connected run capacitor to improve its efficiency.
CSIR	Capacitive Start - Inductive Run Similar to RSIR motor, with a different start winding in series with a start capacitor of suitable capacitance to get a high starting torque.
CSR	Capacitive Start & Run CSR version with capacitive run and start windings. Same as PSC motor but with a start capacitor in series with the start winding. A potential starting relay, calibrated for each motor, disconnects the start capacitor at the end of the start. The motor is characterized by a high starting torque (HST) and high efficiency.
PSC	Permanent Split Capacitor: PSC version with capacitive run winding. This motor is characterized by the run capacitor permanently connected in series with the start winding; both remain connected even after the motor starts. The starting torque is enough to guarantee that the compressor starts only with balanced pressures in capillary tubes systems or with a pressure equalizer.
3Ø	Three Phase Three-phase windings with star connections.

* Depending on compressor family, for details contact Technical Support.

ACCESSORIES & EXECUTION

NAKED UNIT

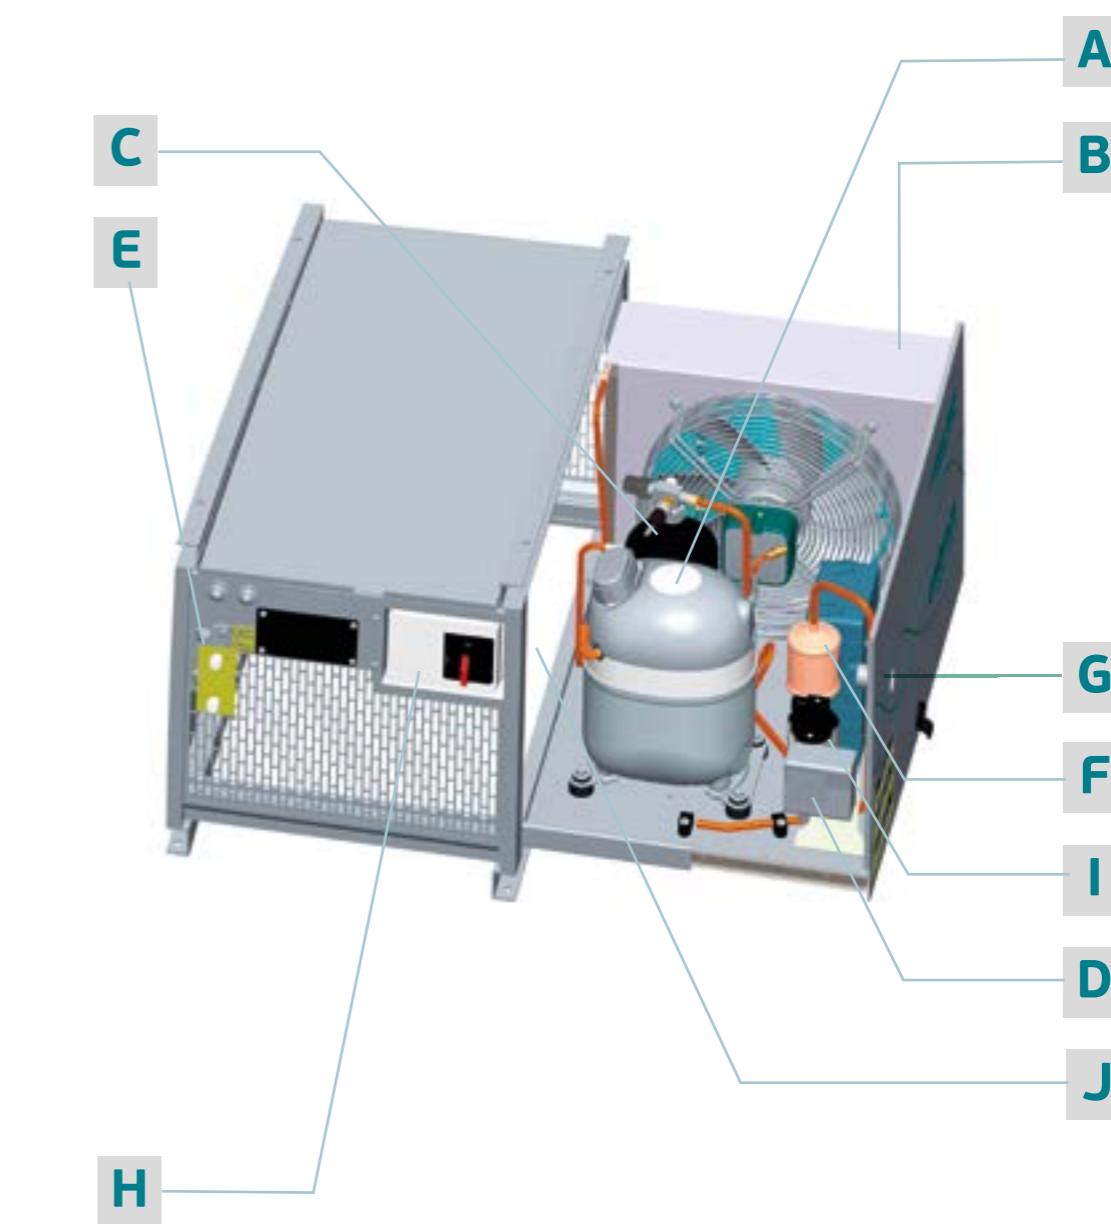

**MAIN PARTS**

A - Compressor / B - Condenser & Fan Mmotor

OPTIONAL PARTSC - Receiver / D - Pressure switch / E - Valves / F - Filter drier /
G - Sight glass / H - Electrical box / I - Fan speed control**embraco**

ACCESSORIES & EXECUTION

SLIDING UNIT

**MAIN PARTS**

A - Compressor / B - Condenser & Fan Motor

OPTIONAL PARTSC - Receiver / D - Pressure switch / E - Valves / F - Filter drier /
G - Sight glass / H - Electrical box / I - Fan speed control /
J - Connect line to the top of unit

CONDENSING UNIT EXECUTIONS

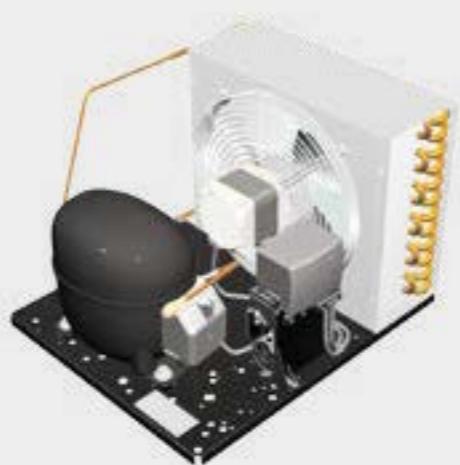

w/o receiver - w/o valves

receiver - schrader valve - valves (flare or solder)

w/o receiver - schrader valve

receiver - schrader valve - valves (flare or solder) - pressure switch

w/o receiver - schrader valve - valves (flare or solder)

receiver - schrader valve - valves (flare or solder) - pressure switch - liquid line

PACKAGING

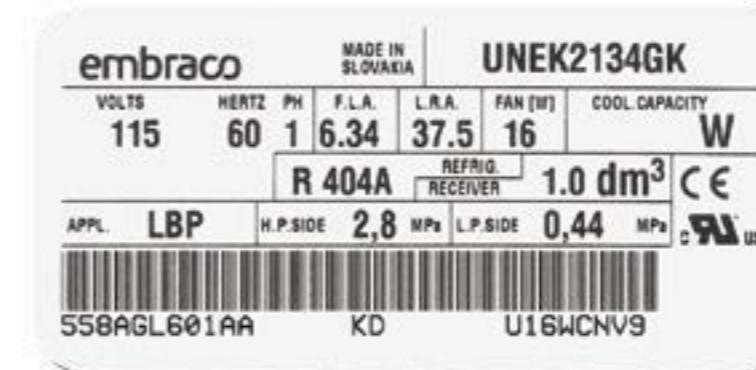

CDU	QUANTITY PER PALLET
UEM	24
